

# asset insurance

## 5 things you should know about asset insurance

### Who needs Asset Insurance?

All people or businesses who are in the possession of one or multiple possessions.

### Why should you take out Asset Insurance?

Simply put, it does ensure that you are placed back into the same position as you were, before the loss occurred & for the item / asset to be replaced correctly.

### How much does Asset Insurance cover cost?

This depends on the type of asset one would be looking at insuring. For example, art and/or jewellery would be considered as an asset, but could be placed under a specialised product on its own such as Art Insurance or Jewellery Insurance also offered by US. It all really depends on the item & value premium that is calculated to the risk. At the end of the day, we have a large book of clients with many different insurance companies, so we will be able to find you the most benefits for the cheapest premiums. AND WE DO!

### Typical claims incurred on Asset Insurance policies

The **most common & most expensive claims** can be from Fire, theft, water damage, accidental damages, loss and so forth.

### What other insurance should be considered along with Asset Insurance?

Should the assets, which are to be insured not fall under any specialised product specifically designed & offered through US then we will combine a policy or to get you covered.

This can be in one of the following other classes of insurance:

- goods in transit
- body corporate insurance
- transport insurance
- money in transit
- commercial insurance
- hole in one insurance ect.
